Applicants' arguments, filed 6/13/02, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claim 6 is rejected under 35 U.S.C. § 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Factors to be considered in determining whether a disclosure would require undue experimentation have been summarized in Ex parte Forman, 230 USPQ 546 (BPAI 1986) and reiterated by the Court of Appeals in In re Wands, 8 USPQ2d 1400 at 1404 (CAFC 1988). The factors to be considered in determining whether undue experimentation is required include: (1) the quantity of experimentation necessary, (2) the amount or direction presented, (3) the presence or absence of working examples, (4) the nature of the invention, (5) the state of the prior art, (6) the relative skill of those in the art, (7) the predictability or unpredictability of the art, and (8) the breadth of the claims. The Board also stated that although the level of skill in molecular biology is high, the results of experiments in genetic

engineering are unpredictable. While all of these factors are considered, a sufficient amount for a *prima facie* case are discussed below.

Claim 6 indicates correcting of a pattern without a target pattern. It is not deemed enabling to perform a correction unless some type of target to be corrected to exists. This rejection is reiterated and maintained from the previous office action, mailed 10/23/01. Applicants argue that a corrected drive pattern is derived by taking into account a target array pattern. In response this target array pattern is therefore the basis for correcting the drive pattern to a targeted drive pattern corresponding to the target array pattern. Thus, this type of correction is not that practice of claim 6 which is still lacking in enablement as not being described as to how to perform this claim practice.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 2-5, 8-14, 17, 52, 56, and 57 are rejected under 35 U.S.C. § 102(a) as being clearly anticipated by Blanchard(WO

98/41531); already of record.

This rejection is reiterated and maintained from the previous office action, mailed 10/23/01. Applicants argue the operating parameter for correction is determined via viewing the dispensing head rather than the substrate. In response the viewed items in the reference do, in fact, include the dispensing head because the camera is utilized as described in the bridging paragraph between pages 63 and 64 as to calibrate the substrate relative to the substrate, scanning, transport, and print head assembly which is impossible unless all three are viewed in order to generate the relative positions as needed for correction. See especially page 63, lines 23-26. This argument is thus non-persuasive regarding this rejection.

Claims 49-51 and 55 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 49-51 and 55 are allowed.

THIS ACTION IS MADE FINAL. Applicants are reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE

PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
